

General information

Here is a workshop where you are welcome, if you are competent, to hire equipment to saw, plane, thickness and sand your projects. We have panel saws, an edge bander and a hinge drill for particle board work and planers, thicknessers, bandsaws, sanders and more for solid timber work. Your machine usage is calculated by the minute by our computer system. Our aim is to maintain machines to be accurate to ± 1 mm. You are welcome to visit and inspect the equipment to see what you can do but **please phone to book time** on machines and an operator if necessary. Operators are not always available and we do not provide a design service.

We stock a wide range of board products including MDF, particle board and plywood with access to a huge range of melamine, veneered board and laminates in various sizes, colours, finishes and species. We stock cabinet timbers including Radiata and Hoop Pine, Silky and Tasmanian Oak, NG Rosewood, Kwila and Red Cedar.

Once you have planned your job and are ready to machine it, phone 3274 5677 to book time on the machines and an operator if you are not competent.

How it works

When you are ready to begin your work session see WNY staff for a tag which enables you to use the workshop and allows the computer to track charges. From the time you receive an activated tag and until it is brought back to the office and deactivated you will be charged 'under the roof' (UTR). Mostly machine charges apply only while the machine is tagged on (the blue light is on). WNY staff can explain further and demonstrate.

Instruction

Although most of our customers are trade qualified, we offer handymen/women the opportunity to learn to use our industrial woodworking machines with one on one instruction. **Booking is essential.**

Pricing (calculated per minute or part thereof) \$/hr

UTR (under the roof) – the time your tag is

activated until it is returned to the office **\$18**

SAWS

Panel Saw – 3.8m travel, timber blade or fine blade and scriber \$30

Panel Saw – 3.4m travel \$24

Rip Saw bench \$24

Radial Arm Saw \$24

Large Bandsaw (10mm blade) \$27
